Telis Modulis RTS

The 1st thumbwheel remote control for adjusting horizontal blinds

Available in two version and 3 different finishes:

Telis 1 Modulis RTS

- Lounge
- Pure
- Silver

Telis 1 Modulis RTS Lounge for the precise adjustment of blind slats.

Telis 4 Modulis RTS

- Lounge
- Pure
- Silver

Telis 4 Modulis RTS Silver to adjust the slats of several horizontal blinds in a single movement to control up to 4 groups of motors

- A central thumbwheel for alignment of blind slats. Gradually fine tune the orientation of the blinds slats by scrolling the thumbwheel to the desired position.
- The thumbwheel is ergonomically designed for intuitive use and sensitive touch for precise positioning of blind slats.
- The << my >> button enables a favourite position to be memorized. Pressing the My button will automatically send the blinds to this position.
- Modulis function available with Modulis Slim Receiver and compatible RTS motors.

Radio Technology Somfy
